INTRODUCTION

Janah Mining Development Company located in Hormozgan province, in the city of Janah. It has been active since 2005 in the production of industrial salt, taking advantage of its location close to the Sea and the possibility of exporting to other countries in the region.

The company has two salt mines, one of which is of the highest quality in Iran and produces pink and red salt. Through continuous activity and research, the company has diversified its products to include a variety of salt products to meet market demand. They produce industrial salt, pink and red salt, decorative salt, animal salt, sanitary salt, salt therapy, salt blocks and tiles for construction, and salt sloop for the stone industry. The company has been recognized as an exemplary entrepreneur producer and exporter of salt samples.

Pink and red salt is a healthy alternative to refined salt as it preserves all permitted minerals and minerals including iron, which is essential for the body. Janah Mining Development Company is well positioned for exports due to its proximity to the sea and various ports. The original salt factory is one of the largest and most equipped salt factories in Iran and plays a significant role in exporting and introducing Iranian salt products to the world.

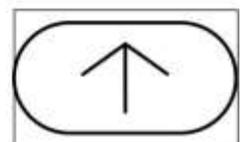

INDUSTRIAL SALT

Industrial salt, also known as mineral salt, is extracted from mountain mines in its raw stone form. This type of salt is widely used in almost half of the chemical industry, and petrochemical products heavily rely on it. Unlike table salt, industrial salt does not undergo any washing process. For it to be usable, high-quality mines and stones must be used in its production.

Industrial salt is mainly used in oil drilling and refining companies, and it is also used to manufacture chemicals, as well as for road salt and snow plowing, textile processing, metal melting, leather production, paper, and pulp production, ion exchange of water conditioning, saltwater construction and more.

Depending on its intended use, industrial salt can come in different sizes such as powdered form or granules. The packaging sizes are 35 kg bags or 1-ton jumbo bags.

EDIBLE SALT

JPink salt has been found to have higher nutritional properties compared to refined salt and sea salt through scientific research conducted over the past few decades. Experts in the food and nutrition industry have concluded that natural substances in this type of salt are highly beneficial for daily use. It is recommended to use this type of salt for cooking as it is a healthy substitute for refined and sea salts that are commonly available in the market.

Pink Edible Salt health benefits:

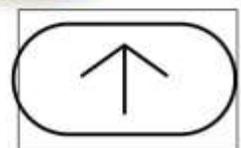

- 1 Removing body toxins
- 2 Treatment of throat sputum
- 3 Balanced Serotonin Hormone Intensity
- 4 Healing of Anemia
- 5 Improve blood flow in arteries and veins.

- 1 Pink powdered salt
- 2 Grain salt 110 sugars pink
- 3 Grain salt 120 or table salt.
- 4 Lenticular salt
- 5 Pea grain salt
- 6 Almond grain salt
- 7 Pink rubble,

Depending on the type of customer order and market demand in the grains. There are different manufacturing capabilities.

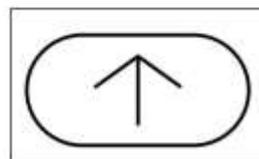

The packaging sizes available are 20kg bags and 1-ton jumbo bags.

1-ton jumbo bags.

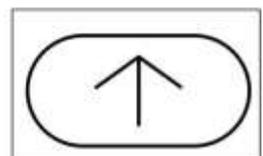

20kg bags.

SALT BLOCK

JANAH SALT/ 08

Introducing the collection of Salt Blocks - the first-ever mining of salt rock in block form, which has revolutionized the salt industry. Customers can request the production of salt blocks based on their requirements.

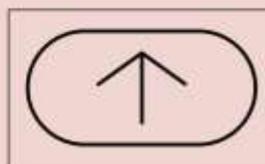

The patterns are characterized by unique swirling veins and lines formed by mineral deposits in the block. The overall effect is elegant and timeless, making it a popular choice in interior design and architecture.

SALT SLABS, TILES & BRICKS

JANAH SALT/ 10

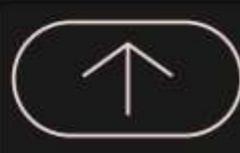

SALT FOR INTERIOR

Salt blocks and bricks can be used to construct salt rooms and spa rooms. Salt therapy and medical science can be implemented in two ways:

- The first method involves constructing a salt room using tiles and slabs for the interior facade.
- The second method involves constructing a salt room as a cave or spraying salt powder on the wall and ceiling. This creates a naturally occurring salt cave.

The materials used in this company have been produced and registered nationally. The salt chamber has several properties that make it beneficial for health. Firstly, it purifies the air and reduces inflammation, and mucus production, which in turn makes breathing easy. This helps to relieve and treat asthma, allergies, chronic sinus cramps, and other respiratory problems. Secondly, it protects against flu and cold due to its antiviral and fungal properties. The pink salt in the salt chamber is rich in 84 minerals that are useful for the body. It makes the skin more youthful by absorbing the moisture of the stone, bringing freshness to the skin. The antibacterial and inflammatory properties of the pink salt stone potentially help to clean up things such as eczema and psoriasis. The negative ions in the air help boost mood and energy, remove stress, and promote relaxation, which in turn leads to better sleep.

SALT SLABS FOR GRILLING

Pink Edible Salt health benefits:

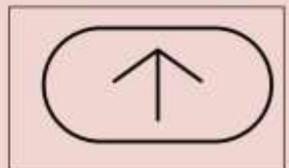

- 1 Grill pan salt does not need oil.
- 2 Does not burn food.
- 3 Salt is an antiseptic substance and disinfects it while cooking.
- 4 This pan is organic, and its therapeutic properties have been proven.
- 5 Salt is an antibacterial, and no microbial contamination remains on it.
- 6 If scratched, it will not cause illness like the other types of non-stick cooking ware.
- 7 By cooking on this barbecue, natural nutrients such as iron, copper, magnesium, chlorine, manganese, and potassium are absorbed into the food.

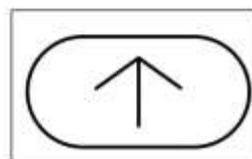

DECORATIVE SALT

JANAH SALT/ 14

This company can produce various decorative items such as lampshades, statues, vases, and salt containers. Additionally, they produce decorative salt products such as salt cubes, cylinders, and balls.

Properties of Salt Stone Lamp:

1

The natural color of the salt lamp enhances the beauty of the place where it is installed. It has a unique appeal that distinguishes it from other artificial stone lampshades.

2

When used as a sleep light, salt stone lamps can improve breathing and purify the ambient air. Breathing in this environment can strengthen the immune system, disinfect the lungs, and increase oxygen absorption in the blood.

3

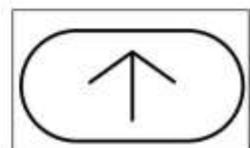

The relaxation effect of the salt stone lamp promotes high-quality sleep.

4

The lamp can also induce relaxation and reduce negative waves, negative thoughts, and stress in the environment where it is located.

5

The lamp is known to increase positive energy and partially regulate blood pressure and circulation in the body.

These salt bricks showcased are sold to manufacturers for the purpose of customization according to their individual preferences.

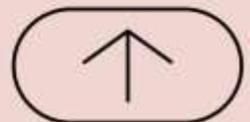

The salt bricks are available in any size as per requirement. They can be further customized into vases, lamps, and various other sculptures.

MASSAGE SALT STONE

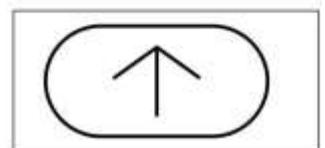

JANAH SALT/ 18

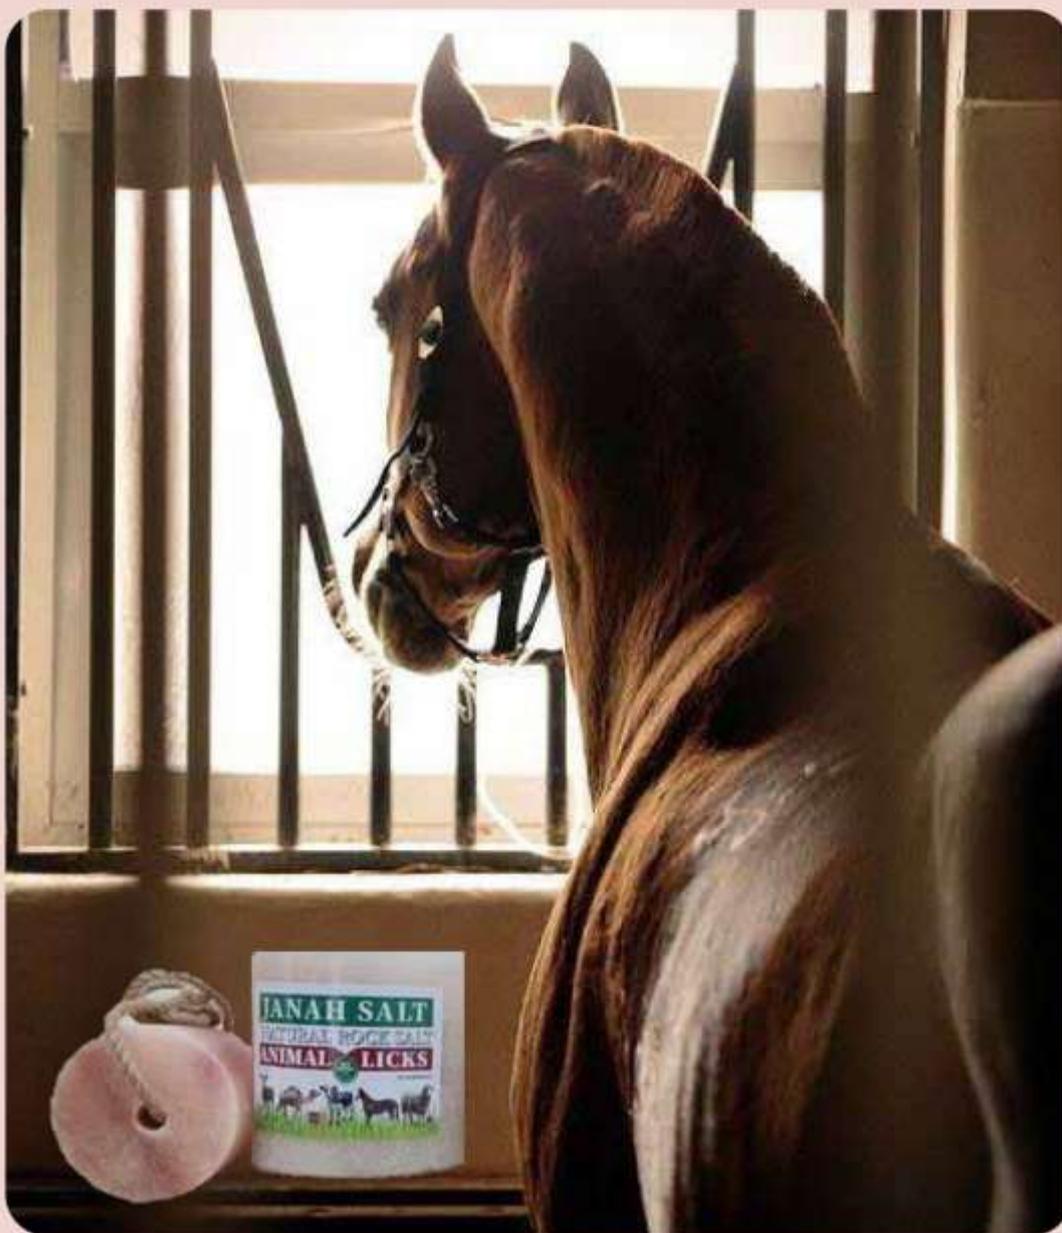

Benefits of Salt Massage Stones Lamp:

- 1 Promotes healthy blood sugar.
- 2 Helps lower blood pressure.
- 3 Supports a healthy respiratory system and sinuses.
- 4 Boosts bone health and prevents muscle cramps.
- 5 Improves circulation.
- 6 Relieves anxiety and addresses insomnia.
- 7 Lightly exfoliates the skin and is highly relaxing.

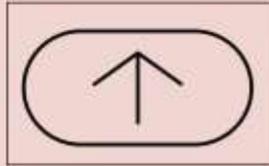

We have a variety of shapes such as:

ANIMAL LICK SALT

JANAH SALT/ 20

Today, the use of Pink salt in livestock consumption has gained special attention due to its unique properties.

This mineral strengthens the muscles (heart muscle) and improves the function of hormones and the nervous system. Daily use of salt in the cattle diet increases the appetite and growth of cattle. Stone salt is one of the important additives to animal feed. Salt is a vital factor in the growth, reproduction, and improvement of livestock health. Two combinations of sodium and chloride help to digest and absorb food better. The use of salt in animal diets eliminates worms, and germs and disinfects the stomach and intestines.

Our company takes pride in producing high-quality livestock salt stones in various sizes, as well as salt powder molds and presses containing authorized additives and raw salt presses, depending on the customer's order and market demand. Our standard livestock salt stones come in three sizes: 12 cm, 15 cm, and 20 cm in diameter. The animal salt molds or presses are produced in cubes of a standard size of 15 cm.
