Natural Spring Salt

Pure. Unrefined. Naturally Balanced.

Natural Spring Salt is sourced directly from flowing mineral springs emerging beneath natural salt domes and mountain formations.

Collected using traditional and hygienic methods, it remains unprocessed preserving its natural purity and mineral balance exactly as found in nature.

Purity & Composition

SALT
SALT HOUSE

- Purity level: over 99.5%
- No chemical processing
- No bleaching or additives
- Naturally occurring mineral elements retained

Source & Origin

- Derived from natural mineral spring
- Flowing beneath mountains
- Located far from industrial environments
- Harvested using traditional methods
- Naturally dried in open air

Naturally Occurring Minerals

Calcium (Ca^2)
Contributes to the normal function of bones teeth, muscles, and structural balance.

Magnesium (Mg^2)
Involved in energy production, muscle relaxation, and nervous system function.

Potassium (K)
Supports normal muscle activity, fluid balance, and everyday vitality.

Lithium (trace amount)
Present in very small natural quantities; studied for its supportive role in emotional balance.

Sulfate (Sulfur compounds)
Plays a role in metabolic processes and contributes to the natural structure of skin, hair, and connective tissue.

Mineral Element	Approx. Amount
Sulfate (SO_4^{2-})	2300 mg
Calcium (Ca^{2+})	1100 mg
Potassium (K^+)	290 mg
Magnesium (Mg^{2+})	200 mg
Lithium (Li^+)	2 mg
Natural Purity	> 99.5%
